

# RELIABLE MOBILITY

## MADE FOR HOME

Well-engineered home lift solutions designed around everyday movement,  
thoughtful integration and dependable support.

# DEPENDABILITY FROM DAY ONE.

A considered approach to home mobility, from choosing the right lift to installation and continued support.

A home lift needs to do more than fit the space. It needs to work naturally with the way the household moves, day after day.

LEVITEX begins with the home itself, taking into account its layout, lift requirements and the people who will use it. From model selection and installation through to after sales support, our approach places reliability, safety and practical usability at the centre of every project.

The result is a home lift solution that feels carefully considered from the beginning and continues to make everyday movement easier long after handover.

A man with a beard and mustache, wearing a light grey blazer over a black t-shirt and blue jeans, stands in a factory or warehouse setting. He is looking directly at the camera with a slight smile. The background is slightly blurred, showing industrial equipment and large windows.

---

***Our goal is simple.  
We want families in  
Malaysia to trust us  
for safe, reliable home  
lifts, backed by good  
service, local support  
and continuous  
improvement that make  
everyday living easier  
and more comfortable.***

---

Farhan, CEO of Levitex

# WHY LEVITEX

## **Considered Engineering**

Home lift solutions developed around dependable performance, safety and the practical requirements of residential use.

## **Responsive After-Sales Support**

Local assistance for servicing, maintenance and technical enquiries when support is needed after installation.

## **Professional Installation**

An experienced team helps coordinate the installation process with attention to the home, the lift and the project requirements.

## **Safety-Focused Operation**

Available safety systems include emergency controls, power-outage assistance and protective features designed around everyday use.

## **Solutions for Different Homes**

Choose from hydraulic, enclosed traction, configurable traction platform and traction gantry formats depending on the project.

## **Planned Around Your Space**

Lift selection takes into account the home layout, available space, preferred lift format and the overall interior environment.

## **Long-Term Everyday Convenience**

A well-planned home lift can make movement between floors simpler for different members of the household while supporting changing family needs.

# HYDRAULIC OR TRACTION

Start with the home, then choose the lift format that fits it.

LEVITEX offers one hydraulic and three traction-based home lift solutions.

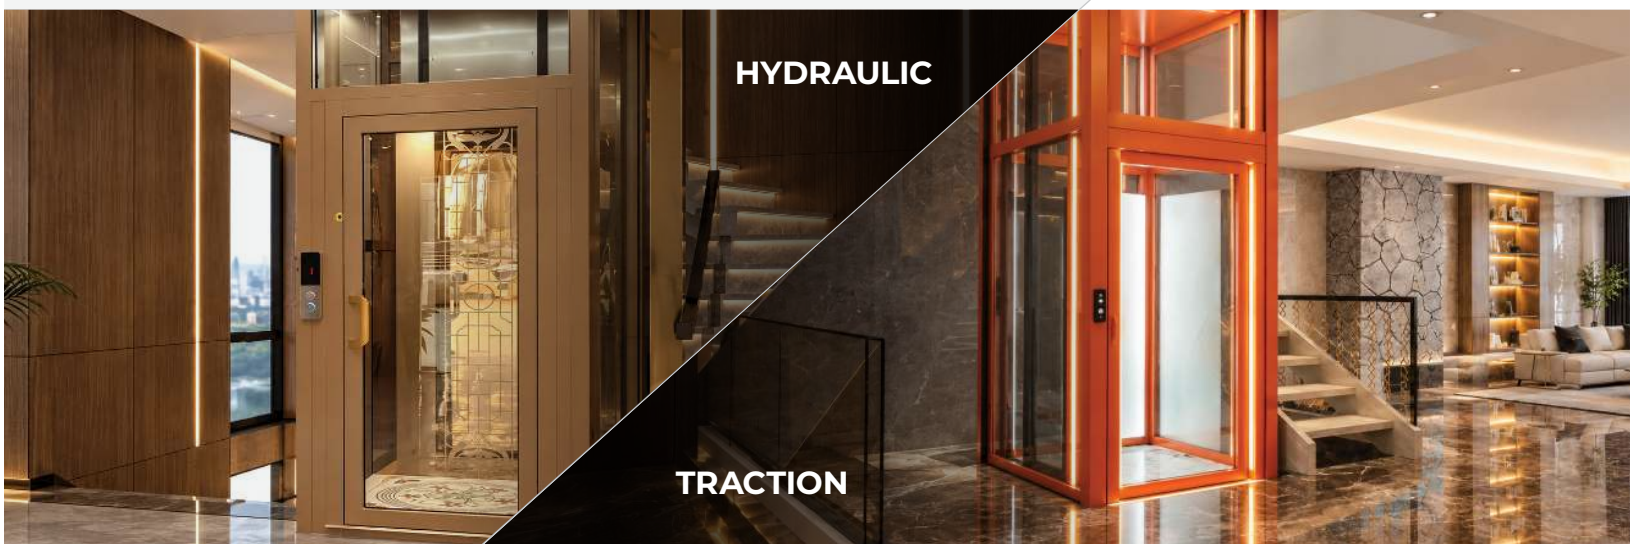

Rather than choosing by technology alone, consider the lift format, available space, level of privacy, design preferences and project requirements before deciding on the right model.

Final suitability and dimensions should always be confirmed against the selected model and approved project drawings.

## Hydraulic

### LEVITEX **PLUS**

- A practical hydraulic home lift positioned around everyday comfort and sensible value.
- A straightforward starting point for homeowners who place function and ease of use first.

## Traction

### **SIGNATURE** • **PRO** • **MAX**

- Three traction solutions developed for different residential priorities.
- Choose between an enclosed cabin experience with SIGNATURE, greater visual customisation with PRO, or the more architectural gantry format of MAX.

## Choose based on technology, lift format, home type and the level of design flexibility you need.

The LEVITEX range is structured to give homeowners a clearer choice, from a practical hydraulic solution to enclosed traction, a highly configurable traction platform lift and a more design led gantry format.

|  <b>Typical Home Application</b> | Double-storey home          | Bungalow/ Semi-D        | Modern bungalow                        | Bungalow/ Villa                    |

LEVITEX  
**PLUS**

# PRACTICAL COMFORT, DAY AFTER DAY.

A straightforward hydraulic home lift for homeowners who value comfort, safety and sensible value.

LEVITEX PLUS keeps the focus on what matters most in everyday home mobility, making movement between floors simple and practical.

As the hydraulic model within the LEVITEX range, PLUS provides a clear starting point for homeowners who prioritise everyday function, comfort and sensible value.

For double-storey homes, it offers an uncomplicated way to introduce residential mobility without making the lift a dominant visual feature of the interior.

**SIMPLE TO LIVE WITH.  
EASY TO RELY ON.**

## LEVITEX **SIGNATURE**

# COMFORT WITH MORE PRIVACY.

An enclosed traction home lift for homeowners who prefer a more private, composed cabin experience.

LEVITEX SIGNATURE introduces traction technology in an enclosed lift format.

Its cabin-led design creates greater separation from the surrounding space, making it suited to homeowners who prefer privacy and a more enclosed experience when moving between floors.

Within the LEVITEX range, Signature also provides the starting point from which PRO evolves. While Signature keeps the experience enclosed and composed, PRO expands the concept through a more modern shaft treatment and significantly broader visual customisation.

**PRIVATE. COMPOSED.  
COMFORTABLE.**

LEVITEX  
**PRO**

# MAKE IT YOURS

A more configurable traction platform lift designed to work with the home around it.

LEVITEX PRO takes the SIGNATURE concept further with a more contemporary shaft design and a much wider choice of customer selectable details.

From the frame and platform finish to the calling devices, lighting and doors, homeowners can shape more of the lift's visible character around the surrounding interior.

Instead of treating the lift as a fixed design, PRO gives you more freedom to create a combination that feels considered as part of the home.

---

**ONE PLATFORM.  
MORE WAYS TO  
MAKE IT FIT.**

---

## CUSTOMISE THE DETAILS THAT MATTER.

Build your LEVITEX PRO from a broad selection of available design options, combining the elements that best suit your interior, preferences and project requirements.

### Colours

### Key Specifications

#### Capacity & Performance

- Load capacity: 400 kg
- Travel height: Up to 12 m
- Speed: 0.3 m/s
- Stops: Up to 5 floors

#### Design & Customisation

- Platform size: Fully customisable
- Doors: Swing doors, automatic sliding doors, or glass options
- Cabin finishes: Glass, stainless steel, wood laminate, or custom colours
- Lighting: Soft LED ceiling lights for a warm, modern ambience

#### Technology & Power

- Drive system: Traction MRL
- Shaft requirement: Minimal structure, no deep pit needed
- Power supply: Single-phase, energy-efficient operation

LEVITEX  
**MAX**

# WHEN THE LIFT BECOMES PART OF THE SPACE.

A traction gantry solution for bungalow and villa settings where the lift is intended to make a stronger visual statement.

LEVITEX MAX brings a more architectural character to the LEVITEX range.

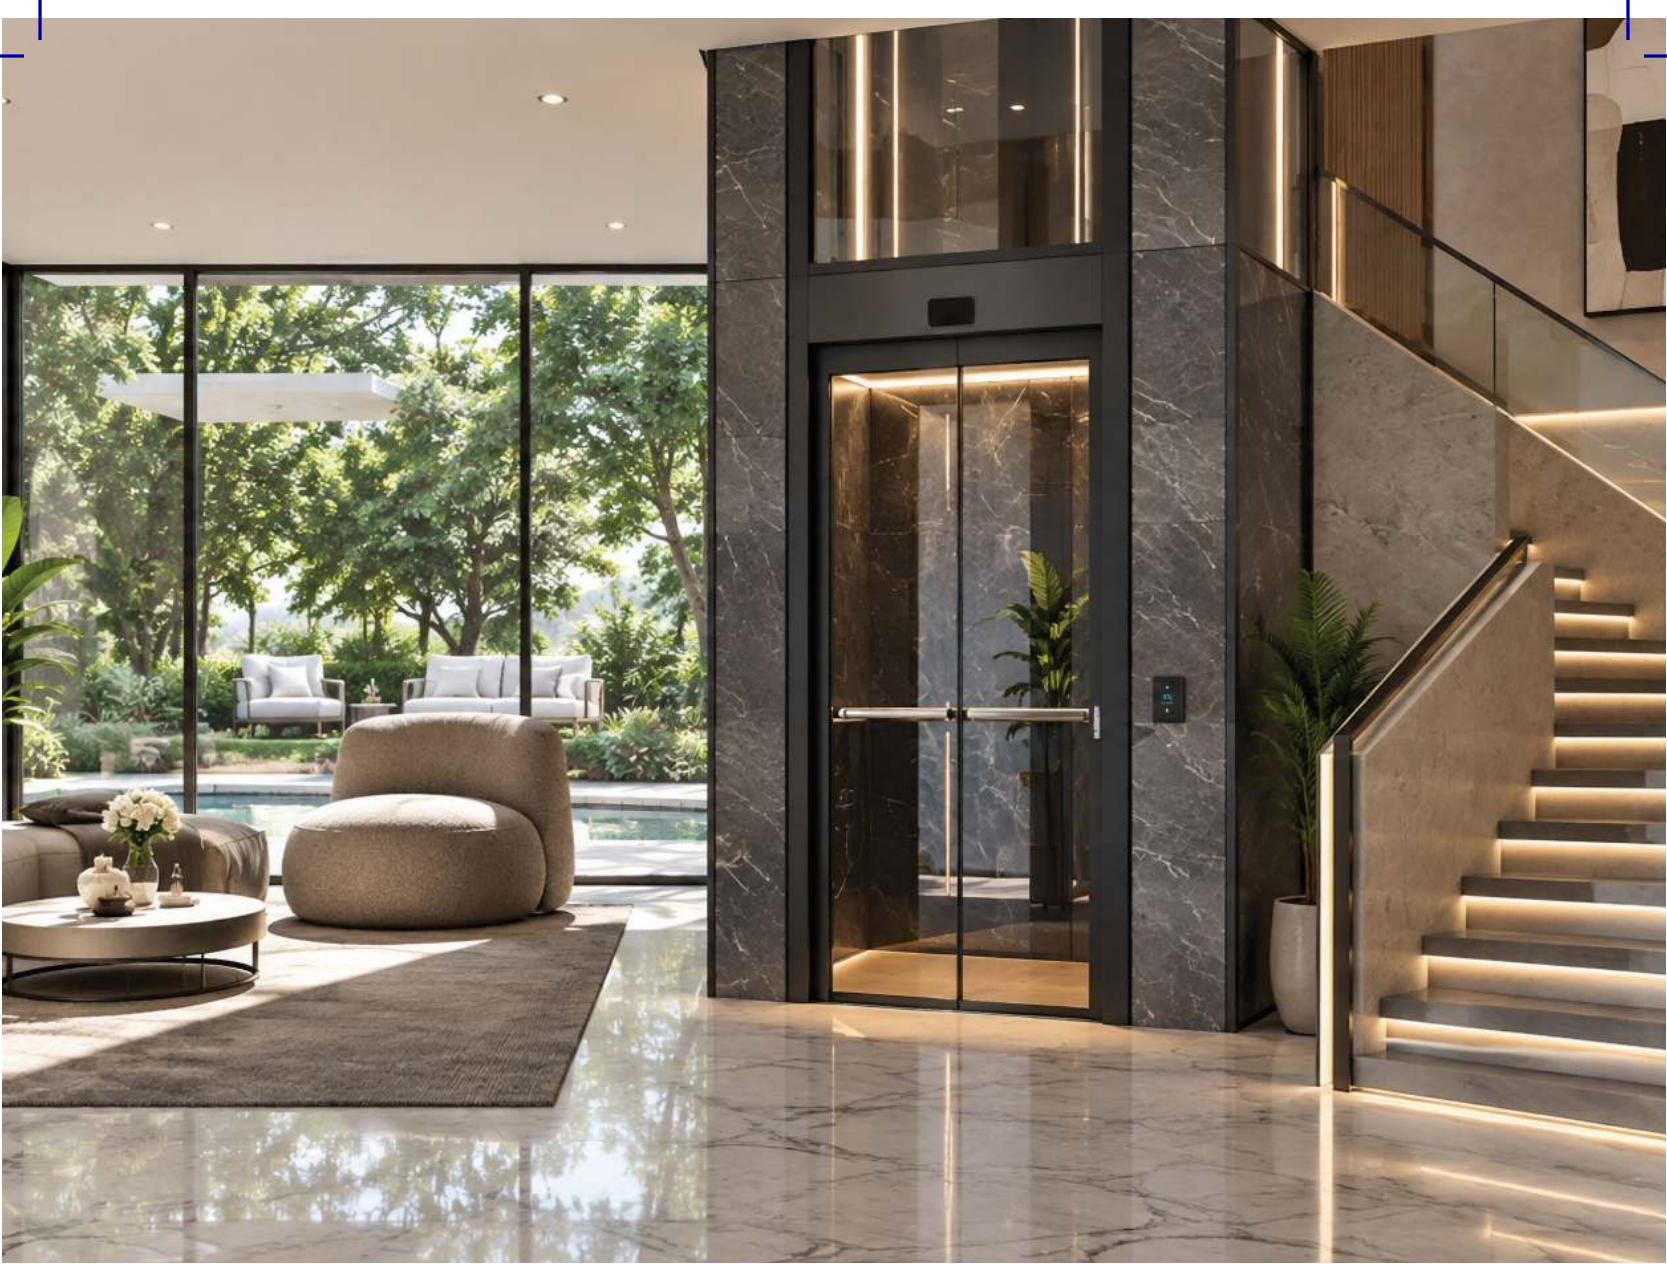

Its traction gantry format and glass led design direction are suited to homes where the lift is expected to contribute more visibly to the surrounding interior, rather than simply provide movement between floors.

Positioned at the more design-led end of the range, MAX is intended for homeowners who want home mobility to feel deliberately integrated into the space around it.

---

**MADE TO MOVE.  
DESIGNED TO BELONG.**

---

# SAFETY & RELIABILITY

## Engineered protection. Dependable support.

LEVITEX approaches home mobility with safety and reliability built into the experience, from everyday operation to emergency situations and continued support after installation.

Depending on the selected model and configuration, available safety features include emergency stop controls, power-outage emergency levelling, door safety protection, overspeed protection and one-touch emergency calling.

### Platform Safety Border

A pressure-responsive safety frame surrounds the platform and reacts when external pressure is detected, helping reduce the risk of trapping or accidental contact during operation.

### One-Touch Emergency Call

Emergency contacts can be pre-set in advance, allowing users to call for assistance quickly with one key if a lift fault occurs.

### Intelligent Door Protection

One-touch door opening makes entry, exit and carrying belongings more convenient. When an obstacle is detected, the door system responds to help prevent hand pinching.

### Privacy & Access Settings

Face-recognition access can be configured according to customer requirements, helping control access to selected floors and improve privacy.

### Comprehensive Safety Logs

If a fault occurs, the system automatically records it for review. This helps the technical team identify issues more efficiently while allowing lift status to be checked through the intelligent control system.

### Guided, Controlled Movement

Weight-balancing components and guide rails work together to support steady movement and accurate travel, while the safety braking system is designed to respond when abnormal conditions occur.

### E-Stop & Child Lock

An emergency stop button allows the lift to be stopped immediately in an abnormal situation, while the child-lock function helps prevent accidental operation by children.

Our support does not end after installation. LEVITEX provides local after-sales assistance, professional maintenance services and technical support to help keep your home lift operating reliably over time.

 **One Year Warranty**  
Coverage for parts and workmanship

 **Professional Maintenance**  
Scheduled servicing helps maintain lift performance and ongoing safety.

 **Genuine Spare Parts Support**  
Access to genuine replacement parts with responsive support when servicing is needed.

 **Dedicated Customer Support**  
A team ready to assist with technical questions, service requests and general enquiries.

 **Annual Inspection & Safety Check**  
Regular checks to help maintain safe operation and consistent performance.

 **Optional Extended Warranty Plans**  
Additional coverage options for longer-term peace of mind.
